

About VEP Wires & Cables

New-age technological needs are changing, and to stay ahead you need nothing but the best in cable technology. Whether for connectivity or transmission, VEP has emerged as a prestigious manufacturer for an array of cables befitting demanding industrial requirements. VEP is known for quality in cable manufacturing, driven by a team of experts that has placed the company amidst the prominent cable manufacturers in India.

Functioning for over a decade as a power cable manufacturer, VEP provides solutions for clients across the country. With a strong R&D setup, the company develops cables that meet the most challenging applications, incorporating the latest technology. Timely delivery is assured through streamlined production and a well-maintained supply chain, helping VEP cater to clients' needs with utmost efficiency. Working under a policy of total quality management, VEP has built a loyal client base who not only use but recommend its wires and cables.

Product Range Overview

This catalogue covers VEP's full Wires & Cables range: 17 product lines spanning house wiring (Superio, Classo, Arizo), flame-retardant and flame-retardant low-smoke flexible cables, service and submersible cables, speaker cables, and data/surveillance cabling (LAN, coaxial, telephone, CCTV).

Product Range

Wires & Cables

1 Superio Wires

Superio Wires from VEP. Equipped with triple layer insulation, Superio ensures enhanced electrical and fire safety.

FEATURES

- Triple Layer Insulation for better safety.
- Moisture guard resists moisture, ensuring long-lasting safety & protection.
- Anti-termite insulation to resist the termite attack on PVC insulation.

1 SUPERIO
V-Guard Wires And Cables

Superio Wires
from **V-Guard.**

Equipped with triple layer insulation, Superio ensures enhanced electrical and fire safety.

FEATURES

-  Triple Layer Insulation for better safety.
-  Moisture guard resists moisture, ensuring long-lasting safety & protection.
-  Anti-termite insulation to resist the termite attack on PVC insulation.

TRIPLE LAYER INSULATION
ENHANCED SAFETY & PROTECTION

Wires & Cables

2 Classo+

Enjoy long-lasting protection with VEP Classo+ Wires. Armed with triple-layer insulation technology.

FEATURES

- Triple Layer Insulation for better safety.
- Anti-termite insulation to resist the termite attack on PVC insulation.
- Moisture guard resists moisture, ensuring long-lasting safety & protection.

The advertisement features a coiled yellow cable with a black label that reads 'V-GUARD WIRES AND CABLES 2 CLASSO+'. A cross-section of the cable is shown, revealing its internal structure. The cross-section is divided into four layers, each labeled with a yellow dot and text:

- Conductor**: High purity copper for better conductivity.
- Inner Insulation**: High grade PVC insulation.
- Middle Insulation**: Anti-termite insulation.
- Outer Insulation**: Moisture guard PVC insulation.

On the left side, the 'V-GUARD' logo is displayed above the text 'WIRES AND CABLES'. Below this, the text '2 CLASSO+' is prominently shown. A paragraph states: 'Enjoy long-lasting protection with V-Guard Classo+ Wires. Armed with triple-layer insulation technology.'

A 'FEATURES' section is highlighted with a yellow background. It lists three features, each with an icon:

- Triple Layer Insulation** (shield icon): for better safety.
- Anti-termite insulation** (termite icon): to resist the termite attack on PVC insulation.
- Moisture guard** (water drop icon): resists moisture, ensuring long-lasting safety & protection.

At the bottom, four icons represent certifications and qualities: ISI Marked, Flame Retardant, RoHS Compliant, and Safe & Reliable.

Wires & Cables

3 Classo

Enjoy ultimate safety with VEP Classo Wires. Equipped with a 3-layer insulation technology, Classo ensures enhanced electrical and fire safety.

FEATURES

- Triple Layer Insulation for better safety.
- Extra flexibility for easy wiring.
- High conductivity of copper (102% IACS) & low conductor resistance.

The advertisement for V-Guard Classo Wires and Cables features a black background with yellow and white text. On the left, the V-Guard logo (a stylized kangaroo) is above the text 'V-GUARD WIRES AND CABLES' and 'CLASSO'. Below this, a paragraph states: 'Enjoy ultimate safety with V-Guard Classo Wires. Equipped with a 3-layer insulation technology, Classo ensures enhanced electrical and fire safety.' A 'FEATURES' section follows, listing three points with icons: 'Triple Layer Insulation for better safety.', 'Extra flexibility for easy wiring.', and 'High conductivity of copper (102% IACS) & low conductor resistance.' In the center, a large coil of red Classo wire is shown. To its right is a box of Classo wire, which also displays the V-Guard logo, 'CLASSO', '3 LAYER INSULATION FOR EXTRA SAFETY', and three icons for 'Triple Layer Insulation', 'Extra Flexibility', and 'High Conductivity Copper'. A 'SINCE 1977' badge is on the box. Below the box, a '3 LAYER INSULATION EXTRA SAFETY' badge is shown. At the bottom right, three icons represent 'ENHANCED SAFETY', 'FIRE SAFETY', and 'RELIABLE PERFORMANCE'.

V-GUARD
WIRES AND CABLES

CLASSO

Enjoy ultimate safety with V-Guard Classo Wires. Equipped with a 3-layer insulation technology, Classo ensures enhanced electrical and fire safety.

FEATURES

- Triple Layer Insulation** for better safety.
- Extra flexibility** for easy wiring.
- High conductivity of copper** (102% IACS) & low conductor resistance.

4

Speaker Cables

Speak out to the world without compromising on the sound quality with the amazing range of Speaker Cables from VEP.

FEATURES

- 99.97% pure copper.
- Uniform capacitance throughout the length.
- Better flexibility for easy wiring installation.

The advertisement features a dark background with a large, coiled V-Guard speaker cable in the foreground. The cable has a braided copper outer sheath and a black V-Guard label. In the background, a speaker is visible. The text 'V-GUARD' is prominently displayed in the top left, followed by 'SPEAKER CABLES' in large white letters. Below this, a paragraph describes the product. Three feature icons (copper strands, waveform, and a bend) are shown on the left, each with a description. At the bottom, three icons (shield, waveform, and chain) represent 'HIGH SAFETY', 'HIGH PERFORMANCE', and 'LONG LASTING' respectively.

V-GUARD

SPEAKER CABLES

Speak out to the world without compromising on the sound quality with the amazing range of Speaker Cables from V-Guard.

FEATURES

-  **99.97%** pure copper.
-  **Uniform capacitance** throughout the length.
-  **Better flexibility** for easy wiring installation.

Wires & Cables

5

Flame Retardant Low Smoke and Low Halogen Flexible Cables

Searching for the best cables to safeguard your home? Your search ends with VEP Flame Retardant Low Smoke and Low Halogen Flexible Cables.

FEATURES

- Anti-termite insulation to resist the termite attack on PVC insulation.
- Superior insulation resistance to prevent leakage.
- Triple layer insulation for better safety.

The advertisement features a black background with a yellow border at the top and bottom. On the left, the V-Guard logo (a stylized kangaroo) is above the text 'V-GUARD WIRES AND CABLES'. Below this, the product name 'FLAME RETARDANT LOW SMOKE AND LOW HALOGEN FLEXIBLE CABLES' is written in large, bold, yellow and white letters. A paragraph of text follows: 'Searching for the best cables to safeguard your home? Your search ends with V-Guard Flame Retardant Low Smoke and Low Halogen Flexible Cables.' Below this, a 'FEATURES' section lists three points with icons: 'Anti-termite insulation' (termite icon), 'Superior insulation resistance' (lightning bolt icon), and 'Triple layer insulation' (stack of layers icon). On the right, a coiled black cable is shown with its end cut open to reveal three colored conductors (blue, yellow, red). A yellow shield icon with a flame and the text 'FLAME RETARDANT' is positioned above the cable. The cable itself has 'V-GUARD FLAME RETARDANT LSZH FLEXIBLE CABLES' printed on it. At the bottom, a yellow bar contains five icons: 'FLAME RETARDANT' (flame), 'LOW SMOKE EMISSION' (smoke), 'LOW HALOGEN' (Cl), 'RoHS COMPLIANT' (leaf), and 'IS:694 CM/L-7200128415' (ISIRI logo).

Wires & Cables

6

Flame Retardant Flexible Cables

Ensure utmost safety in your home with VEP Flame Retardant Flexible Cables.

FEATURES

- Operating Temperature of up to 70°C.
- Superior insulation resistance that supports insulation performance in electrical circuits.
- Improved FR suitable for Indoor wirings.

Wires & Cables

7

Service Cables

VEP Service Cables are made using annealed rigid bare electrolytic grade conductor, insulated and sheathed with specially formulated PVC, suitable for outdoor installation.

FEATURES

- 99.97% pure copper.
- Complies with Bureau of Indian Standard Cables for outdoor installations - ISI with OU marking.
- Specially designed for outdoor usage.

The advertisement features a black background with a yellow and white V-Guard logo at the top left. Below the logo, the text 'SERVICE CABLES' is prominently displayed in large, bold, white letters. A descriptive paragraph follows, stating that the cables are made using annealed rigid bare electrolytic grade conductor, insulated and sheathed with specially formulated PVC, suitable for outdoor installation. To the right, two black cables are shown, one with its copper conductors exposed, and the other with the text 'V-GUARD SERVICE CABLES' printed on it. In the foreground, a large coil of black cable is shown, secured with white straps. A yellow label on the coil features the V-Guard logo, the text 'SERVICE CABLES', and 'OUTDOOR CABLES | 99.97% PURE COPPER'. To the left of the coil, a 'FEATURES' section is highlighted with a yellow background. It lists three features, each accompanied by an icon: 99.97% pure copper (copper wire icon), compliance with Bureau of Indian Standard Cables for outdoor installations - ISI with OU marking (ISI logo icon), and specially designed for outdoor usage (cloud and rain icon).

Superio Plus Wires

VEP Superio Plus Eco Safe wires, engineered to exceed expectations by combining advanced technology with superior materials for the highest standards of reliability and protection.

FEATURES

- HRFR wires - withstand temperatures up to 105°C as per IS 694 in suitable indoor conditions.
- Moisture guard - high resistance to discoloration of copper conductors with special polymer triple layer.
- Anti-termite and anti-rodent insulation - specially formulated, non-poisonous compound.

V-GUARD
WIRES AND CABLES

SUPERIO PLUS WIRES

V-Guard Superio Plus Eco Safe wires, engineered to exceed expectations by combining **advanced technology** with superior materials for the highest standards of **reliability and protection**.

FEATURES

- HRFR WIRES**
withstand temperatures up to 105°C as per IS 694 in suitable indoor conditions.
- MOISTURE GUARD**
high resistance to discoloration of copper conductors with special polymer triple layer.
- ANTI-TERMITE AND ANTI-RODENT INSULATION**
specially formulated, non-poisonous compound.

ECO SAFE
Safe Cable. Safe Life.

9

Flame Retardant Low Smoke and Halogen Flexible Cables

Triple Layered PVC Wiring Cables with HFT Technology, manufactured in conformity with ISI standards at an ISO 9001, ISO 14001 & OHSAS 18001 certified plant.

FEATURES

- Triple Layer Insulation for better safety.
- 99.97% pure copper.
- Colours: Red, Yellow, Blue, Black, Green, Grey & White.

V-GUARD
WIRES AND CABLES

FLAME RETARDANT LOW SMOKE AND HALOGEN FLEXIBLE CABLES

Triple Layered PVC Wiring Cables with HFT Technology, manufactured in conformity with ISI standards at an ISO 9001, ISO 14001 & OHSAS 18001 certified plant.

- TRIPLE LAYER INSULATION**
for better safety
- ANTI-TERMITE INSULATION**
to resist the termite attack on PVC insulation
- MOISTURE GUARD**
resists moisture, ensuring long-lasting safety & protection

Wires & Cables

10 Arizo Wires

Regular wires can't take the heat - they melt, release harmful smoke, and deteriorate over time. Arizo is built for the pressure.

FEATURES

- Melt-resistant wires with E-Beam technology - withstand temperatures up to 125°C.
- Moisture guard - high resistance to discoloration of copper conductors.
- Continuous operating temperature of 125°C with advanced E-Beam technology.

Wires & Cables

11 Telephone Cables

Start a new conversation with the world with the amazing range of Telephone Cables from VEP.

FEATURES

- Low Power Loss.
- Low Crosstalk.
- Fire Retardant Jacket.

Product Range (cont.)

Wires & Cables

12 LAN Cables (Cat 6 Series)

Built for the growing need for real-time data transfer without transmission loss or theft, across cross-border communication platforms.

FEATURES

- Better crosstalk and system noise characteristics.
- Excellent performance up to 250 MHz.
- Suitable for 10BASE-T, 100BASE-TX.

Product Range (cont.)

Wires & Cables

13 Coaxial Cables (RG6 Series)

Looking for the right cable for smooth, trouble-free data transmission? VEP's coaxial cables are highly customizable for a wide range of applications.

FEATURES

- Protects signals from external electromagnetic interference.
- Very low attenuation or signal losses.
- Suitable for both analog and digital transmission.

The advertisement features a large image of a coiled black coaxial cable with a braided copper shield and a white connector. The text 'V-GUARD COAXIAL CABLE RG6 SERIES' is printed on the cable. The background is white with a black and yellow curved border at the top and bottom.

Wires & Cables

14 Round Cables (Multicore)

VEP is a major manufacturer of Multicore Rounded Cables in the country, available in a wide range and variety.

FEATURES

- Special grade PVC for better flexibility.
- Better finish and strength for heavy duty applications.
- Sheath colours: Ivory, White, Grey & Black.

The advertisement features a large image of a black V-Guard multicore cable with four internal conductors (green, red, yellow, and black) exposed. The V-Guard logo, featuring a kangaroo silhouette and the text 'V-GUARD WIRES AND CABLES', is visible on the cable's sheath. To the left of the cable, the text 'V-GUARD ROUND CABLES (MULTICORE)' is prominently displayed. Below this, a paragraph states: 'V-Guard is a major manufacturer of Multicore Rounded Cables in the country, available in a wide range and variety.' A 'FEATURES' section follows, with four icons and their corresponding descriptions: 'High Quality Annealed Copper' (copper wire icon), 'Superior Insulation' (shield icon), 'Flame Retardant (FR) PVC' (flame with slash icon), and 'Strong & Durable' (chain link icon). At the bottom right, a black banner contains the text 'SAFE • RELIABLE • LONG LASTING'.
